HANRUN PAPER INDUSTRIAL CO., LIMITED

Process of Light Inkjet T-shirt Transfer Paper

Light-colored inkjet transfer paper is suitable for transferring image onto light-colored cotton or cotton-mixed fabrics. It is printed with common color inkjet printers using water-base ink (pigment ink)

1. Mirror Printing:

- Printer setup: Recommend the select "Quality Inkjet Paper" mode for satisfactory printing results.
- Mirror printing the wishful image onto the transfer paper. Then leave it to dry for about 10 minutes.
- Cut out the image, leaving a narrow margin of 5mm around the pattern edges.

2. Transferring:

- Preheat the heat press machine, and set the recommended transfer temperature 185°C
- Place the image-printer paper on the textile, printed image side facing down.
- Transfer for 15-30 seconds under certain pressure, then remove the textile from the machine.
- Peel off the base paper immediately.

3. Washing:

- It's best not to wash the textile in 24 hours after transferring.
- Washing the textile in cold or 30-40°C, with transferred pattern inside out.
- Do not wash with strongly alkaline detergents, and do not bleach. Avoid rubbing the transferred pattern when hand washing
- Do not wring. Line dry in shade recommended.

1. Mirror Printing

A . Printer setup

B . Mirror printing the image

C . Cut out the image

2. Transferring

**A . Preheat &set
the temperature
185°C**

**B . printed
(image) side
facing down**

**C . Transfer for
15-30 seconds**

3 . Finished

**D. Peel off the base
paper immediately**

E . Final result

F . Detail result
